

Putting post on the map.

Promap is a division of The Landmark Information Group – the UK's leading supplier of digital mapping, property and environmental risk information. It provides high quality Ordnance Survey based digital mapping to enterprises both large and small and has over 26,000 users.

The accounts department of The Landmark Information Group was responsible for printing and posting all **Promap's** invoices and statements, however as the division grew a need to work more efficiently and productively emerged.

Matthew Teague, Group Financial Controller explains: "As the division grew the accounts department became more and more stretched. We needed to hire casual labour to help us process invoices, place in envelopes and deliver them to the postroom.

"Excluding entering the data into the Oracle accounting system, producing and posting around 10,000 monthly invoices took our personnel over 4 days to process every month. So when we discovered TNT-it, it was a real boon."

TNT-it provides a fully automated and secure postal service that places documents such as letters, invoices and statements into the post

straight from your desktop – eliminating the hidden costs of producing and sending mail.

Matthew Teague, Group Financial Controller says: "Switching to TNT-it made mail handling very easy for us. Our **Promap** system produces one large PDF file, containing thousands of documents of varying lengths.

"After providing samples, TNT-it was pre-configured to make it '**Promap** ready'. The subsequent installation and configuration by a TNT-it technical consultant was completed in less than two hours – including testing. Now the billing run is compiled overnight and the resulting PDF file is automatically captured and processed by TNT-it.

"What used to take us days to complete and plan has now been reduced to just a few minutes per month. The project has been so successful that we intend to introduce the software across the rest of the group. This will increase the number of documents to an estimated 25,000 per month..."
